_18.Apr.08 | Netwaves plays homage to One Bit Wonder, Thinnerism waves goodbye

First of all, we would like to thank all of you for the emotional comments regarding our closing. Be sure that your feedback is still much appreciated.
Belgium [Radio Scorpio](#) plays a homage to One Bit Wonder on the [netwaves show](#). Ten bits from the last three years plus an interview with [Mirsch](#) about 1bit and netaudio in general. Thanks to Jasper for this.
1bit is the latest addition to [Thinnerism's](#) "Netlabel who care" series: It's a [very nice feature](#) including snippets of an interview with [Steffen](#) about the label philosophy and some of the reasons for our closing.

_28.Mar.08 | More vinyl and the end of 1bit

Again, one of our tracks has been licensed for a vinyl re-release: [Juno6'](#) "Salamis" from our last compilation ([1bit 025](#)) is available as [Broque LP11](#) now - plus remixes by our very own [Steffen Bennemann](#) and Cio D'Or.
1bit #032 by [Latex Distortion](#) and [Gary West](#) will be our last release. Too many other projects have been consuming our time lately, so instead of doing things half-heartedly we decided to quit when it's best. Thanks for three wonderful years full of love and great music! Our site will remain active for a while and may still serve you as an archive.
